Is your crop insurance agent walking through your policy with you? Is your agent explaining the risk management of yield and revenue policies? Which is best for you? CIMXag Agents are dedicated to creating a long-lasting, trusted relationship with its clients by customizing crop insurance to fit your specific needs.

KNOWING WHAT YOUR PAYING FOR

Do you know what your Crop Insurance Policy covers? Many farmers sign up for the same policy every year without reviewing their current policy. Times change, coverage changes, and markets change that all reflect what is best each year for your coverage.

CORRECT COVERAGE

You may be paying for things in your current policy that no longer applies to you. Often we overlook the fine details of a policy to check a box off that we are covered and that's enough. The problem is you may be spending money that you don't have too and not receiving the payout you deserve.

MARKETS VS. PRICES

Current markets and commodity prices affect what kind of coverage you need for your farm. Often that is a costly oversight. Yield vs. Revenue Coverage is a huge importance when it comes to protecting the financial needs of your family.

TRUSTWORTHY AGENTS

CIMXag agents are dedicated to creating long-lasting and trusted relationships. We promise to educate you on the different policies, review your current policy, and help you make the best decision for your farm each year to maintain the farming industry and keep you farming productively.
