

Sales Closing Date (SCD)

The Sales Closing Date (SCD) is a critical deadline for growers. Meeting this deadline ensures proper coverage for the upcoming crop year.

Policy Transfers: If you have been insured in recent years and wish to transfer your policy, you will need to provide your previous policy number and Approved Insurance Provider (AIP) name. While a Schedule of Insurance (SOI) is preferred, an Actual Production History (APH) database will also be accepted.

Accurate Information: It is essential to provide your insurance agent with the correct details, including: the name of your entity, the counties in which you farm, the crops you are insuring, and any associated Substantial Beneficial Interests (SBIs) or signature authorities.

Proper Signatures: When signing crop insurance documents, ensure the insured policy name matches how you file your taxes.

FSA Compliance: To receive premium subsidies, you must comply with the AD-1026 requirements with the Farm Service Agency (FSA). The compliance deadline is June 1st each year.
